Software engineer

## WHO AM I?

I am a software developer with more than three years of experience who started his career with a passion for GNU/Linux and later fell in love with typings in duck typing languages.  
I worked on data-oriented applications with Python, Django, React, etc.  
I have experience in the education and finance industry and I am very enthusiastic about startups.

## SKILLS

- Git
- Python
- Django
- Gitlab-CI
- GCP

– Benchmarking the technologies to find the best fit for the service.  
– Participating in designing the service architecture and database schema.  
– Developing the application based on approved designs.  
kubernetes / docker / nodejs / postgresSQL / nest-js / GraphQL / redis /

6/2019 – 4/2020

### Fullstack Python developer - Full-time

"

I was the maintainer of KNITO studio, a part of Knito Digital Book Store. knito.com

- Adding multi-tenancy support to the STUDIO
- Adding interactive elements to the EPUB
- Integrating the application with SSO and other microservices.
- Developing new features such as Referencing inside the epub, advanced features for HTML Table, etc.
- Configuring CI/CD of the application
- Debugging the old code

kubernetes / docker / django / postgresSQL / redis / drone / Javascript /  
react / celery / aws /

## EDUCATION

2014 – 2019

### Bachelor's Degree

University of Tehran

Information Technology engineering

Thesis: Intro to DevOps, and comparing container-based virtualization and serverless

Activities and societies:

- Assistant for database course 2019
- Member of IT Association 2015 - 2017

## LANGUAGES

**English** - Working proficiency

**French** - A1

**Persian** - Native

## HOBBIES

I love running, biking and building simpler life using new technologies

I trade in stock markets in my free time.
